PROFESSIONAL EXPERIENCE

Senior Technical Recruiter – **MCGBS** *Apr 2026 – Present*
Staffing Company | India

- Leading end-to-end recruitment for semiconductor and IT roles across client requirements.
- Managing sourcing, screening, and candidate pipeline management for specialized technical positions in the semiconductor domain.
- Coordinating with clients to understand niche technical requirements and translating them into targeted sourcing strategies.

Senior HR Recruiter / Recruitment Lead – **KoiReader Technologies** *Sep 2024 – Mar 2026*
AI Startup (~100 employees) | Remote

- Led end-to-end hiring for 20+ specialized technical roles including Computer Vision, DevOps, Infrastructure, and Bare Metal Engineering, contributing to 50+ total hires with 90%+ offer acceptance rate.
- Built and implemented AI-powered recruitment workflows that reduced screening time by 60% while maintaining high candidate quality standards.
- Designed structured interview frameworks and competency-based assessment models for niche technical roles, standardizing evaluation criteria across the entire tech team.
- Mentored 2 junior recruiters and 1 senior recruiter on advanced Boolean search, GitHub sourcing strategies, and niche talent mapping for specialized engineering roles.
- Partnered with engineering leadership to translate complex technical requirements into targeted sourcing strategies and employer branding initiatives.

HR Manager – **Devkraft** *Dec 2021 – Sep 2024*
IT-Services/Product Development Startup (20→70 employees) | India

HR – Talent Acquisition / Generalist – **Devkraft** *Dec 2019 – Dec 2021*
(5→20 employees)

- Owned end-to-end HR operations during a 3x team growth phase, managing full employee lifecycle from hiring to exit.
- Implemented HRMS from scratch, improving process visibility, efficiency, and data management across the organization.
- Managed payroll coordination for a 60-70 person distributed team, processing monthly salary inputs, variable components, and tax proofs with zero compliance issues.
- Established campus recruitment program across 6 Tier-1 engineering colleges and 7 Tier-1 business schools, building an early-career talent pipeline for technical and non-technical roles.

- Designed structured onboarding program covering technical setup, policy orientation, and role-specific training for engineering and operations hires.
- Collaborated with founders on strategic HR planning, team structuring, and organizational design initiatives.
- Led vendor management, including complete office setup for Bangalore and Gurgaon locations.
- Managed end-to-end recruitment for technical roles, contributing to rapid team scaling during 3x growth phase.
- Built structured talent pipelines using Boolean search, LinkedIn Recruiter, and GitHub sourcing strategies.
- Partnered with hiring managers to improve role clarity, refine job descriptions, and optimize hiring outcomes.
- Ensured strong candidate experience through streamlined communication and effective onboarding coordination.
- Led and managed a team of up to 8 recruiters, overseeing daily operations, workload distribution, and performance.
- Acted as the first point of contact for employee and management queries, including those directed to the CTO, ensuring timely resolution and clear communication.
- Drove resource mapping exercises to align team capacity with project demands and business growth plans.
- Contributed to P&L calculations by tracking recruitment costs, headcount planning, and resource utilization data.
- Supported payroll coordination by managing attendance records, leave inputs, and salary data for the growing team.
